

eoda | Data Science Use Case Workshop

Key Facts

- One-day on-site **workshop** in which we – together with you – evaluate data science use cases with regard to your data situation or expected benefits as well as identify yet unknown use cases for your company.
- **Preparation** and **documentation** of the workshop.
- Preparation of collected information: You will receive a transparent and objective evaluation of the identified use cases in form of a **balanced scorecard**. Moreover, we will create a qualitative reporting of the most promising use cases.

Fields of Application

- Companies which are looking for the best use case for them to unlock the potential of data science.
- Companies which have a variety of use cases and are aiming for an objective evaluation and prioritization of those use cases.
- Companies in the digital transformation which want to implement data-based analysis processes or optimize existing processes.

Advantages

- ✓ **Security:** Use the Data Science Use Case Workshop to form a basis for successful data science projects with a fast ROI.
- ✓ **Experience:** Our extensive experience in the conception and implementation of data science projects is incorporated in the Data Science Use Case Workshop.
- ✓ **Transparency:** We evaluate your use cases with regard to all relevant criteria and prepare our results for you in a transparent and comprehensible way.
- ✓ **Industrial transfer:** We believe in a cross-industry approach. One success formula of data science is to transfer methods which have originally been developed for a specific field effectively to other use cases.
